

# EVOLUTION

>> TAKE THE  
CHALLENGE

## >> NEW DRIVE UNIT NEW PERFORMANCE

Dinamismo e supporto armonico sin dalla partenza. Adatti a qualsiasi percorso, i 5 livelli di assistenza renderanno divertenti ed agili i viaggi sulla **Lombardo Evolution powered by Bosch** anche grazie al nuovo design più compatto e più leggero dei nuovi motori. Il nuovo concetto di trasmissione riduce la resistenza alla pedalata in caso di motore spento e di velocità superiore a 25 km/h e l'e-Mountain biker può sentire una sensazione di pedalata naturale.

*Energy and harmonic support since the start. Right for every path, the 5 assistance levels will let you enjoy your trips on the Lombardo Evolution powered by Bosch thanks to the new compact and light design of new Drive Units. Thanks to the new concept of bottom bracket, the Lombardo e-biker can pedal naturally when the drive unit is off and the speed is over 25km/h.*

**75 Nm**

**MAX TORQUE**

Accelerazione potente anche con una struttura compatta  
*Powerful acceleration also with compact construction*

**340%**

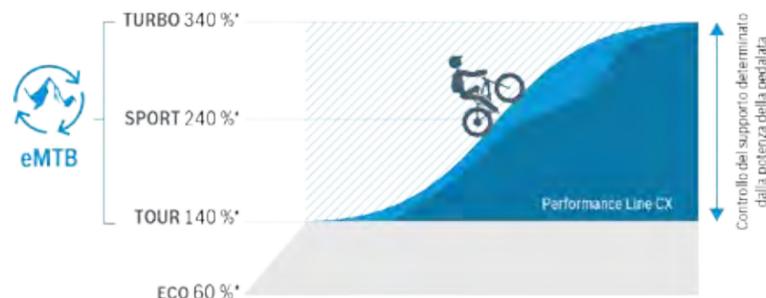

**MAX SUPPORT**

Spinta potente, guida sportiva e sprint rapidi  
*Powerful boost, sportive driving and quick sprint*

**25 km/h**

**DRIVE UNIT**

Supporto costante fino a 25km/h anche sulle salite in montagna  
*Harmonic support up to 25km/h also on the mountain climb*

\*Supporto in % rispetto alla potenza del ciclista

## >> e-MTB MODE

La modalità eMTB offre la possibilità di passare dal livello di assistenza Tour a Turbo. Il supporto progressivo del motore alla pedalata, già a basse frequenze di pedalata, si adatta in modo dinamico alla modalità di marcia individuale, supportando il ciclista sempre con la potenza ideale. Tutto ciò garantisce una sensazione di **pedalata naturale e prestazioni massime** sul trail.

*The e-MTB mode can shift your assistance from Tour to Turbo mode. The e-MTB mode support always the e-biker with an ideal power so he can feel **natural pedaling and maximum performance** on the trail.*

## >> CONNECT YOUR HANDLEBAR

La SmartphoneHub trasforma la pedelec in un'eBike sempre collegata in rete che entra a pieno titolo nella vita digitale: grazie allo smartphone e all'app COBI.Bike, la SmartphoneHub diventa una centrale di comando intelligente che naviga, registra attività e può essere collegata con altri servizi e app. La **Lombardo Evolution powered by Bosch** può essere utilizzata anche senza smartphone, poiché il display integrato nell'hub per smartphone mostra i dati di marcia più importanti. In questo modo viene garantita la massima flessibilità agli eBiker, indipendentemente da quale sia la meta.

*The SmartphoneHub make the pedelec an always connected and more digital e-Bike: thanks to the COBI App, the SmartphoneHub becomes a smart central control that can browse, record the activities and can be linked to other services & app. The **Lombardo Evolution powered by Bosch** can be used without the smartphone because the SmartphoneHub shows itself the most important trip info.*

### NAVIGATOR

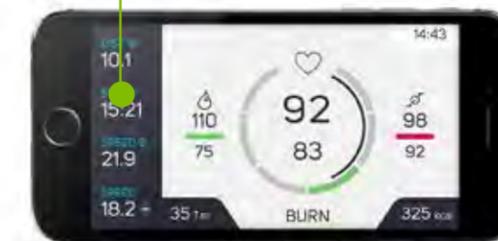

L'app COBI.Bike mostra la strada, con l'opzione di visualizzazione della mappa in 2D e 3D. Le indicazioni di navigazione vengono fornite anche vocalmente. L'eBiker può scegliere tra il percorso più veloce, più corto o più tranquillo.

*The COBI.Bike App shows the 2D or 3D map. There is also a vocal function to give the trip indication. The e-Biker can choose the speediest, the shortest or the quietest path.*

### PERSONAL TRAINER

L'App COBI trasforma lo smartphone in un personal trainer grazie alla possibilità di connettersi con altre App fitness e salute come Apple Health, Google Fit, Strava and Komoot.

*The COBI.Bike app turns the smartphone into a personal trainer by the connection to fitness and health services like Apple Health, Google Fit, Strava and Komoot.*

**METEO WEATHER** Viaggiare spensierati nella natura: grazie all'app COBI.Bike, gli eBiker sono sempre informati sulle condizioni meteo in tempo reale.

*The e-Biker can know always the weather thanks to the COBI.App Bike without worries for during the trip.*

## >> SMART DISPLAY

Kiox è il ciclocomputer per il ciclista sportivo ambizioso. Oltre alle classiche funzioni di un ciclocomputer, Kiox consente di accedere al mondo digitale tramite l'applicazione smartphone **Ebike Connect**. Il display a colori trasmettente da 1,9" garantisce una leggibilità perfetta anche in caso di luce solare intensa. E poiché la retroilluminazione si adatta alle condizioni di luce, tutto è perfettamente leggibile anche al buio.

*Kiox is the perfect display for ambitious bikers. In addition to the classic functions, the Kiox can be connected to the digital world through the **Ebike Connect App**. Perfect legibility into the 1,9 inches display also under the sun and also into the dark thanks to the backlight.*

## >> SUPPORTO MAGNETICO

### >> MAGNETIC SUPPORT

Si sistema velocemente ed è saldamente montato anche per i salti nel fuoristrada.

*Solid mounting through the magnetic support also for off-road jumps.*

## >> CONNETTIVITÀ

### >> CONNECTIVITY

Il display sportivo è il collegamento con il mondo eBike connesso di Bosch. Tutti i dati di marcia rilevanti vengono registrati da Kiox e trasmessi all'eBike Connect App tramite una connessione Bluetooth. L'app registra i dati GPS e queste informazioni vengono unite ai dati di marcia creando così una panoramica e una valutazione di tutte le attività nell'app o nel portale online, dopo la corsa. Kiox può essere collegato a un cardiofrequenzimetro tramite BLE (Bluetooth Low Energy) per controllare la frequenza cardiaca e adattare l'allenamento in modo ottimale.

*All data trips are linked to the Connect App through the Kiox with bluetooth connection: after every trip the e-Biker can check them into the App or into the Online portal. Kiox can be connected to the heart rate monitor through Bluetooth to checking the heart beat and the quality of training.*

## >> SINCRONIZZAZIONE AUTOMATICA

### >> AUTOMATIC SYNC

Tutte le informazioni sempre a portata di mano: i dati vengono sincronizzati automaticamente tra Kiox e l'app tramite Bluetooth. Anche gli aggiornamenti software possono essere caricati sul ciclo-computer in modo comodo e senza cavi.

*In addition to training and trips data, the update software can be simply launched by the Kiox without cables.*

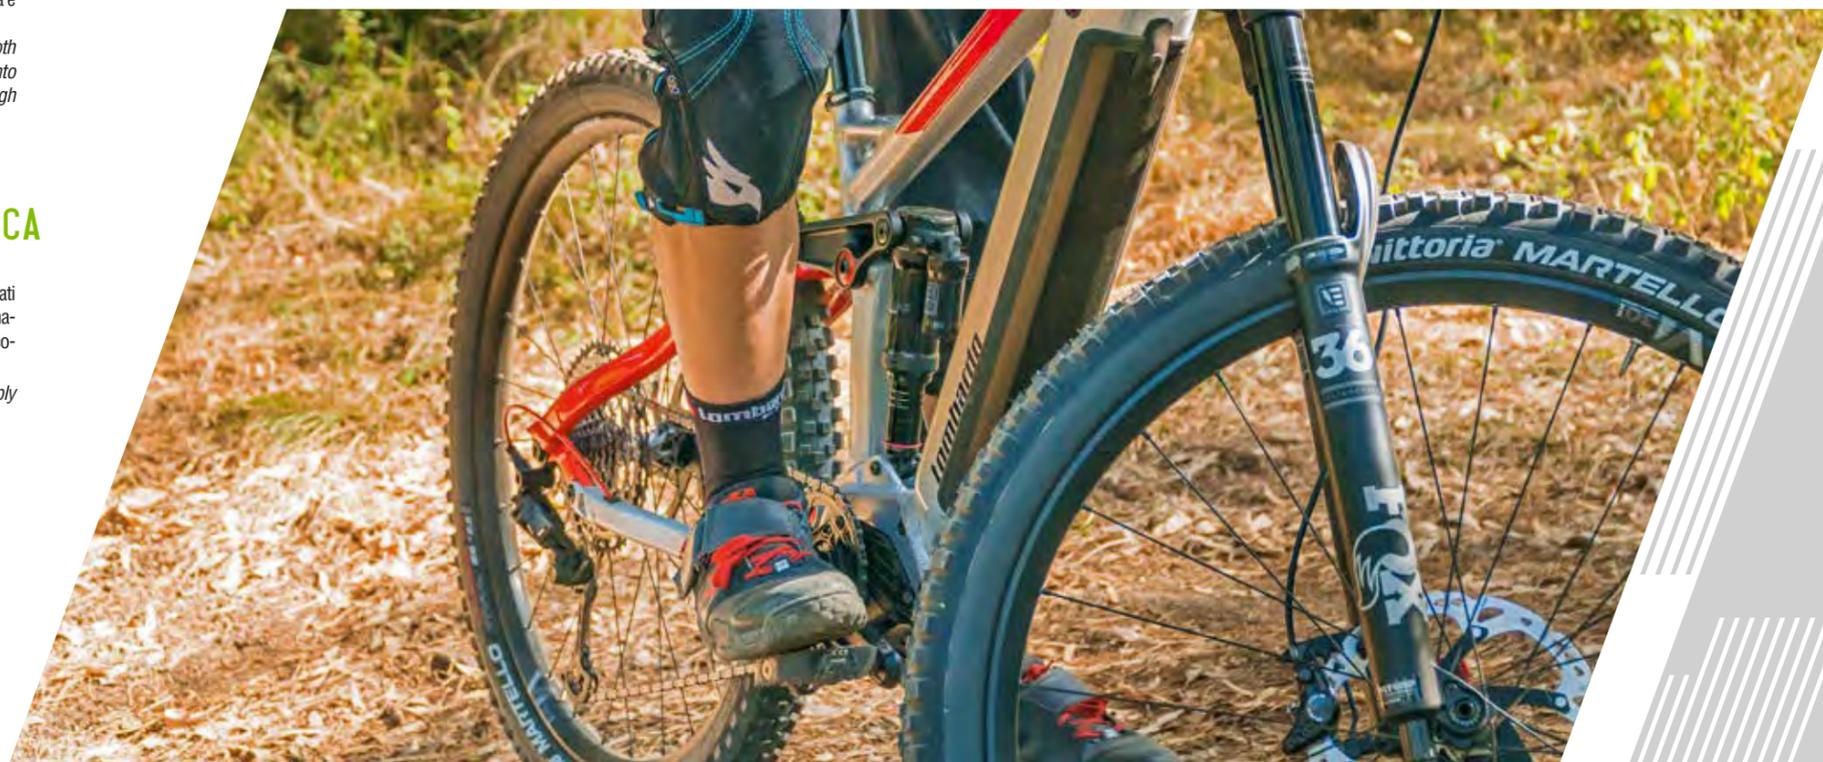

## +INTUBE +AUTONOMY -CHARGING TIME

Per le esigenze più elevate in termini di potenza ed estetica, i Bosch PowerTube garantiscono un alto potenziale energetico durante ogni tour e, grazie alle dimensioni compatte e alla forma minimalista, si integrano perfettamente nel design delle **Lombardo Evolution powered by Bosch**.

*The Bosch Powertubes guarantee high energy, more autonomy and their design is perfectly integrated to e-bike Lombardo Evolution powered by Bosch.*

## >> SAFE DRIVING

Pedolare sicuri è un fattore decisivo. La combinazione tra ABS attivo sulla ruota anteriore e il controllo del sollevamento della ruota posteriore garantisce una maggiore sicurezza. La velocità di entrambe le ruote viene monitorata dai sensori che calcolano il numero di giri delle ruote stesse. Se la ruota anteriore rischia di bloccarsi, in caso di frenate troppo brusche, l'ABS Bosch eBike migliora la stabilità e la manovrabilità dell'eBike, in particolare su fondi stradali scivolosi. Un vantaggio soprattutto per chi guida una **Lombardo Evolution Trekking/City** powered by Bosch

*Safety riding is a decisive factor for e-Bikers. Your safety is enhanced through the combination of front wheel ABS and rear wheel lift control. Wheel speed sensors monitor the speed of both wheels. If the front wheel threatens to lock when the rider brakes hardily, the Bosch eBike ABS regulates the brake pressure and optimizes riding stability and control of the e-bike Lombardo Evolution powered by Bosch – especially in slippery road conditions.*

## >> FAST CHARGER

Ricarica l'energia della batteria della Lombardo Evolution powered by Bosch con il Fast Charger nel piu breve tempo possibile (1h e 30min in meno). Dopo sole 3 ore i potenti PowerTube 500 e PowerPack 500 vengono completamente ricaricati. Per ricaricare una batteria al 50%, il **Fast Charger** impiega poco più di **1 ora**. Per questa ragione è il dispositivo perfetto per ricaricare velocemente la batteria durante gli spostamenti. Il Fast Charger è ideale per le eBike che vengono molto utilizzate e spesso ricaricate.

*Charge the energy of Lombardo Evolution powered by Bosch with the Fast Charger in the shortest time (1h 30min less). The Powertube 500 and Powerpack 500 are fully charged after only 3 hours. The Fast Charger need a little bit more **1 hour by charging** a battery to 50%. The Fast Charger is perfect for the e-bikes that are used a lot and often charged.*

## >> ANTI-TUNING

Nel rispetto dell'attuale norma europea (EN 15194:2017) relativa alle biciclette con motore elettrico, durante la marcia il software dei sistemi Bosch eBike può rilevare, tramite dei sensori, se la pedelec è stata sottoposta a tuning e passare quindi alla modalità di emergenza. Questa soluzione aumenta la protezione della pedelec e del ciclista. Infatti, un utilizzo del sistema non conforme alle norme previste ne riduce, di solito, la durata e gli eBiker rischiano di danneggiare la drive unit e la bici stessa. Se un'eBike viene sottoposta a tuning, non viene più garantita la sicurezza: i componenti e la bici sono esposti a sollecitazioni impreviste e le conseguenze sono difficilmente prevedibili.

*With the anti-tuning solution Bosch complies with the requirement included in current European law (EN 15194: 2017) for electric motor-supported bicycles. This increases protection for both pedelecs and riders. Indeed, an improper use of the system usually reduces its service life and eBikers risk to damage the drive unit and the bike itself. The safety of a tuned eBike can no longer be guaranteed: components and the bike itself are exposed to unforeseen stresses and the consequences are difficult to predict.*

>> Profilo variabile delle tubazioni riduce le torsioni e garantisce sicurezza e precisione di guida, soprattutto in discesa.

*Variable tube profile reduces the twist and guarantees a safe and precise driving, especially downhill.*

>> 25 prese d'aria per un rapido raffreddamento del motore.  
25 air system for a fast temperature reduction of the drive unit.

>> Cover motore in alluminio assicura protezione da colpi accidentali.  
*Alloy Drive Unit cover guarantees the protection from the accidental hits.*

>> Telaio full suspended equipaggiato con ammortizzatore TRUNNION.  
*Full Suspension frame with TRUNNION rear shock.*

# >> EXPLODING SUSPENSION

Il nuovo telaio Sempione è un concentrato di tecnologia per le discese più estreme. Le sensazioni della gara, delle uscite in solitario o insieme agli amici non saranno più le stesse.

*The new Sempione frame is the most technologic one for your most extreme downhill. Your feelings of race, of solitary trip or with friends will not be the same.*

**FAZUA**

## >> TOTAL CONTROL

Il sistema di pedalata Fazua Evation supporta la nostra e-Mugello Road in modo compatto e leggero. Per ottenere il miglior supporto possibile, la frequenza di pedalata deve essere compresa tra 65 e 85 giri / minuto. Grazie ad un sistema di misurazione della coppia su entrambi i lati: maggiore è la forza che si esercita sulla pedivella, maggiore è il supporto che si ottiene. Superando i 25 km/h, l'ingranaggio interno disaccoppia il motore dalla trasmissione e si possono raggiungere velocità superiori, senza dover pedalare contro il motore.

*The Fazua system supports the e-Mugello Road in a compact and light way. In order to get the best possible support from the engine, your pedaling frequency should be between 65 and 85 crank revolutions / minute. The drive system has a two-sided torque measurement: the more power you bring to the crank, the more support you get back. With more than 25 km/h, the freewheel decouples the engine from the transmission and you can reach peak speeds on your own, without having to pedal against the engine.*

## >> JUST A 'CLICK'

Con un solo clic si può estrarre l'unità motore dalla e-Mugello Road e sostituirla con l'apposita cover per il tubo obliquo: in questo modo è possibile utilizzare la bici come una normale bicicletta senza motore.

*It's possible to pull out the drive unit from the e-Mugello road with one click and you can replace it with a cover: so it is possible to use the e-bike like a traditional bike.*
